

A tree gives me life,
So does my family.
It is more like a tree blooming,
With mom,dad,grandparents and me.
My family tree is full of love;
Please come and see.
When I fall from my tree,
There is always someone to rescue me.
My family tree is the best place to be;
In grandparent's lap or knee,
Where my mom and dad curdles me.
There is no other place I would love to be;
Than hanging to 'My Family Tree'.

RUPSHA ROY
Class II A

My Family

I have a loving little family,I live with them happily

My Grandpa is the boss,he decides and loves us a lot.

My grandma is sweet and caring,She always loves sharing.

A father is always a daughter's hero, he is like an umbrella,

Guarding us from all sorrows.

Also in my family I have my mother's parents,

I enjoy the most when I play with them.

Atlast i come to me and my mother, Nowadays i am joyful rather.

In the lockdown she is always with me, Not going to office and not always asking to show my copies.

We now have time to play dance and sing together

That is my Family Tree altogether.

Name- Riddhima Brahmachari
Class-II Sec-A

HEAL UP MOTHER

The sky is blue with birds all around,
The trees are green with leaves around.
We are at home with our family,
For Mother Nature to keep healing.

Heal up Mother, Heal up;
Heal up Mother, Heal up.

We pledge to keep you safe and clean;
We pledge to keep you nourished and green,
Our deeds were against nature's trend,
And now we are on the receiving end.

We promise to help the poor and needy
We promise to care for the sick and shaky.

Forgive us Mother, We feel ashamed;
We assure you, never to repeat the same.

Cheer up Mother, Cheer up,
Cheer up Mother, Cheer up.

Hereafter, we all will be good and wise
Days are not far for the new sun to rise.

Date: 18/06/2020

MADHUSHA MUKHERJEE
CLASS- VII C, ROLL-27

Destruction is the new definition

Destruction is the new definition
Of cities we live in,
Of the years we live by!

I miss those days,
Of clear sky, dusk and dawn,
Of birds' singing waking me up.

We have polluted our lands and seas,
We forgot that Mother Earth isn't
something,
We had inherited from our ancestors but
something we have
Borrowed from our future generations.

I'm trying to get everything back,
From birds' singing to clear skies,
And maintain balance of nature,
By being eco-friendly.

I am Grateful

Today and everyday,

I am grateful
For the sunrise and sunset.

For the forests full of trees.

The animals, the birds,

The lakes, rivers and seas.

I am grateful for everything

given to me and all,
I am grateful for the love that

binds us and the wind
that sometimes knocks ^{us off} our feet.

Today and everyday,

I am grateful.

I promise to care for our planet and
all it has to offer,

I promise to value our mother land
by planting more green.

I choose to celebrate "Earth Day"

Today and every single day, because

I am Grateful

Let Us Save Our Earth

Have we become so heartless and mean
that her painful groan no longer penetrates
us within.

She who is the source of our existence
Is now suffering from endless pain.
She who nurtured us till date ~
is now in a helpless pathetic state.

The trees we have cut so ruthlessly ~
Have snatched her beauty and poisoned
her slowly.

The plastics that we threw here and there
Had covered her soil and entrapped the air.
She no longer can breath so smooth
And that's the cause of these our reckless moves.

Can't we turn back to recover her
By planting saplings with love and care
Can't we boycott the use of plastics ~
and start using the eco-friendly things.

One constructive step from our side
will shade off all her pains aside.

Come let us pledge to restore her smile
And help our Mother Earth lead a healthy life

NATURE

Nature is an important and integral part of mankind. It is one of the greatest blessings for human life; however, nowadays human fail to recognize it as one. Nature has been an inspiration for numerous poets, writers, artists and more of yesteryears. This remarkable creation inspired them to write poems and stories in the glory of it. They truly valued nature which reflects in their works even today. Essentially, nature is everything we are surrounded by like the water we drink, the air we breathe, the sun we soak in, the birds we hear chirping, the moon we gaze at and more. Above all, it is rich and vibrant and consists of both living and non-living things. Therefore, people of the modern age should also learn something from people of yesteryears and start valuing nature before it gets to late.

SIGNIFICANCE OF NATURE

Nature has been in existence long before humans and ever since it has taken care of mankind and nourished it forever. In other words, it offers us a protective layer which guards us against all kinds of damage and harms. Survival of mankind without nature is impossible and humans need to understand that.

If nature has the ability to protect us, it is also powerful enough to destroy the entire mankind. Every form of nature, for instance, the plants, animals, rivers, mountains, moon and more holds equal significance for us. Absence of one element is enough to cause a catastrophe in the functioning of human life.

We fulfill our healthy lifestyle by eating and drinking healthy, which nature gives us. Similarly it provides us with water and food that enables us to do so. Rainfall and sunshine, the two most important elements to survive are derived from nature itself.

Further, the air we breathe and the wood we use for various purposes are a gift of nature only. But, with technological advancements, people are not paying attention towards nature. The need to conserve and balance the natural assets is rising day by day which requires immediate attention.

CONCLUSION

In, conclusion nature has a powerful transformative power which is responsible for the functioning of life on the Earth. It is essential for mankind to flourish so it is our duty to conserve it for our future generations. We must stop the selfish activities and try our best to preserve the natural resources so life can forever be nourished on Earth .

SAVE THE NATURE FOR A BETTER FUTURE

Folks today have become so careless,
By cutting more trees and planting less,
The environment is our basic need;
It is inaccurate to waste it for our personal greed.

Chop! Chop! Hear the trees falling!

Our earth is beautiful as viewed from the sky,
But hold on! Is our mother nature about to cry?
Trees offer to those who love them without gain;
With shade, breeze and tender rain.

Looking above, the sky looks so hazy;
Now dimmed, obscured by pollution I gaze,
For small distance travel use bicycles,
And for long journey utilize the CNG vehicles.

Honk! Honk! Hear the automobiles howling?

Littering is the way of polluting,
So think about the choices you make;
The decision to drop just one wrapper,
Could be the first in the chain of mistakes.

Save the Nature for a better Future.

~ Anastasia Hota-10 B

Save the earth. page 1

I will start from where I am. I will do what I can. I will use what I have. True redamancy, will always advise me to stay loyal and grounded towards nature, for the nature always gives to those who has nothing to give it in return. I should save the earth and I will for what we save, will save us. The earth and it's nature is so illecebrous & radiant that it forces me to believe that it isn't true. Yincet van gogh once said, "everywhere we look, the complex magic of nature blazes before our eyes." The captivating beauty of nature can have a profound effect upon our senses, it fills us with awe, wonder & amazement. Most often, it seems to me, we find these things beautiful not because of something else they might bring us- a piece of furniture or a delicacy to be consumed- but because of the way that the forms of these things immediately strikes us upon observation. Nature can reveal it's beauty in all places & at all times to the eye that knows how to look for it. For a beautiful soul nothing is not beautiful. Therefore we must save it.

There is no 'planet B', after all the earth is what we all have in common. Wendell berry says "what I stand for is what I stand on." The earth makes us all a global citizen. We must follow the R's- reduce, reuse & recycle. We must live in biodiversity to preserve the beauty of nature. We must plant plenty of trees. We must conserve water. We must not waste food and give it to those who need. Because above all, we need to preserve humanity. If not now, then when? If not me, then who?. I must do something for if I do not things will turn perilous and it will be the end of human kind. Can't do it by myself so I'm asking for your help. If people can care about who they believe created the earth, They can care about the earth as well. Exploiting god's creation is exploiting the almighty itself. "Its only one piece of plastic" said 7 billion people. We need to encourage a deep relationship with the world around. Together we can bring about a change. Together we can change the world.

- Mrittika Rakshit. (Class- 10 B)

THE COMPLEXITY DESTROYERS

You, the destroyer started between the sea;
You, the destroyer, got a significance in the decree.
You, the destroyer, came along with Corona;
Don't you know Modiji has said " Corona se Daron"!!!
You shattered the dreams of many;
You've brought down the things that not only worth a penny.
You have come and left on your time,
But Covid 19 will stay till the Jingle bells chime.
You both are the " Complexity destroyers ",
Destroying the Earth throughout the year;
Making 2020 the poisonous year of the decade,
Letting the glory of lightness fade.
But I assure that this time will go,
So that farmers get new seeds to sow;
That will be the harvest of the season,
So, people around stop panicking without any reason.

PRATYUSHA SAHANA, IX B

The fire is burning in the hearts
Of millions of people deprived
The leaders still speak of how
We all should learn to sacrifice.
Sacrifice, yes we children have to do so
As adults are already much
Messed up with their own petty life
With fights which apparently are important
But are they really so?
More Important than our forever forebearer
More Important than the hills and valleys and brooks
More Important than our mother Earth.
A man who plants a tree
Does the most astounding job for life
He initiates a new ancestry
Of trees, so that we can be fine.
But today this democracy we live in
Is being governed by a monopoly
Of a sect of people who believe
Modernization is deforestation, who believe
Intellectuality comes from urbanization, who believe
Green doesn't resemble joy but who believe

To create edifices is life's ultimate point.
We are humans gifted with a voice
A voice to raise, to fight for 'justice'.
We as people just have to stand collectively,
We have to save our planet, our future
With small steps towards the same goal.
What if no one pays heed to our voices?
What if we don't get the desired result?
Do the work for your ethics people,
Don't do it for rewards.
Do it for the suppressed ones people,
Don't do it for rewards.
How much does it take to help our Planet?
How much does it take to understand?
How much does it take to segregate waste and grow a little plant?
The day you plant the seed people
Is the day you eat the fruit.
Its time for us to cease our faults
Its time for us to think
And wait and plan and proceed
To embark a journey of new possibilities.
"Love thy neighbor as thy love yourself"
And conquer all the dark.
And walk and fall and again get up
And amplify the voices of people
